policies which in addition to the
party platform form the basis of
his campaign.

Mr. Woolwine<sup>2</sup> assailed the
economy promises of Friend W.

GLOUCESTER (Mass.) Oct. 9.—
Three servants in the summer home of Miss Caroline Sinkler of Philadelphia, were held as material witnesses today, while the police and Dist.-Atty S. Howard Donnell, pursued inquiry into the death of Stella Zeislott, a maid, and Harry Devine, chauffeur, who are believed to have died from the effects of a polson last Saturday night.

The bodies were found in the kitchen yesterday morning. A bottle of liquor, partly emptied, was on a table.

Those held for examination were Bridget McGheehan, a housekeeper; Helen Gorman, a maid, and William Elkins, the gardener.

His statement to this effect made unanimous the opinion on the question of all American delegates to the interparliamentary union conference at Vienna, a number of Senators, who, with Representative Burton, toured Europe and conferred with leading statesmen and on the remitted.

Representative Burton conferred with President Harding today and, after campaigning in Ohlo, will return here for the meeting this month of the Allied Debt Commission with Great Britain's financial representatives.

Lady Hamilton had been staying at the residence of Mrs. Betsy F. Edmands, at Pigeon Cove, near here. According to the familty there, the wealthy English woman left for Boston last Tuesday to visit friends. They did not hear from her again. Pearl also showed reporters a note she said she had received from Schneider's young wife on the Monday following the finding of the bodies. It read:

"You will pardon my writing to you but I want to tell you to keep away from my husband. When this case comes to trial I am going to beat you to it."

Pearl said she did not know whether Mrs. Schneider referred to the murder trial or a divorce suit between the Schneider which is pending.

Mrs. Schneider also visited her on the same day, she said, and asked to be taken to the spot where the bodies had been found. She compiled with the request, she said. She thought Mrs. Schneider's interest was merely a morbid one.

Schneider's interest was merely a morbid one.

The court at its last term rendered an opinion which reversed the United States District Court for Utah and held that the ownership and control of the Central Pacific by the Southern Pacific was in violation of the Sherman Antitrust Act on the ground that the two systems were competing under the law.

The decision resulted in numerous petitions being presented to Congress by commercial and other organizations, some urging and others opposing the enforcement of the decision. The refusal to reopen the case will result in the issuance of a mandate to the District Court in Utah to give effect to the decision.

PREPARATIONS CONTINUE President William Sproule of the Southern Pacific Company, issued a statement saying he believed the Interstate Commerce Commission would find the weight of facts to justify continued unified operation of the Southern Pacific and Contral Pacific lines under the authority granted the commission by the Transportation Act of 1920.

"Congress passed this act six the Transportation Act of 1920.

"Congress passed this act six years after the suit was begun to force the Southern Pacific to sell the Central Pacific," he said.

"This act directs the Interstate Commeace Commission to prepare plans for the consolidation of the railroads into a limited number of groups. It further specifically exempts the railroads entering into such consolidations from the provisions of the Sherman Antitrust Act, under which the Supreme Court decision was given.

"Therefore, through constructive action, relief from the separation can be had by action of the commission if that body finds it in the interests of the public to maintain the association of the Central Pacific and the Southern Pacific, which have been managed and operated as one concern for after OK & SON "The Union Pacific, in the nature of things, has a deep feeling of gratification that the decision of the Supreme Court will insure an independent Central Pacific system, whose sole interest will be to function wholeheartedly with the Union Pacific in the maintenance of the historic and shortest transcontineatal line between the Missouri River and San Francisco, as originally contemplated by the government and in support of which the Union Pacific has devoted its utmost energies and improvements. The California physician was present at a hearing on the reinstatement of Dr. Philip Shepard of Boston, whose license was revoked last May after complaints had been made against the Abrams method as used by him.

When his certificate was canceled Dr. Shepard said he would endeavor to have Dr. Abrams appear to demonstrate his principle of diagnosia. Practicing physicians and professors of medical colleges assembled today for the demonstration, but were disappointed. The board refused to return Dr. Shepard's registration certificate.

According to physicians at the hearing, samples of bloed were sent from Boston and other cities to California for the Abrams test. A diagnosis based on the so-called vibratory resistance test was then sent book to the local physician.

CRAVED REAL ACTION AT BROOKLYN BLAZE

BOY ADMITTED, FIRE CHIEF SAYS, THAT HE STARTED SERIES OF BLAZES

NEW YORK, Oct. 9.—With six-story factory building in Brook lyn ablase and ten firemen trapped in an unexpected back-draught. Morris Gold, a 17-year-old youth within the police lines about the building, today told Fire Marshal Brophy a tale of personal heroism. Gold, displaying intense excitement, said: "I turned in the first alarm and I helped the firemen with their hose." Marshal Brophy said when he failed to show much appreciation for his assistance, Gold added that he had also started the fire.

Gold added that he had also started the firs.

When the ten firemen had been rescued and the blaze in the factory was out the marshal took Gold to his office. There, according to the marshal, Gold confessed he had started half a dozen fires in Brocklyn in the last two weeks. Asked why he had started them. Gold is said to have replied:

"Oh, just for the excitement, all except today's fire. Today was Fire Prevention Day and I thought we ought to have some real action." He was held on a charge of arson.

American Duty Restricts
Yorkshire's Exports of Wool and Worsteds

BY FRANCIB W. HIRST
[EXCLUSIVE DISPAYEL]
LONDON, Oct. 9. — Torkshire's worsted and woolen trade with the United States has been sharply restricted by the new tariff, but British manufacturers are being compensated by growing exports to Canada and other countries. Animated competition for wool in the Bradford and at Antwerp auctions to resports "quite a scramble for botany noils on American account," and also for thread wastes. The finance trade also is improving.

More cotton machinery in Lanesshire is lide and a conference is being held on the increase in unamployment and distress. Linen.

NEW YORK STOCK EXCHANGE NEW YORK CURB CLOSE

NEW YORK, Oct. 5.—Resumption of the upward movement of prices in todays stock market was given impetus by another series of demonstrations in special stocks, several of which were carried to new high records.

Standard Oil of New Jersey was the individual feature, establishing a new peak price at 246%, with an advance of 17 points. The day's sales exceeded 70,000 shares. United States Steel common was another favorite, touching 103% and closing at 107 5-5, a net gain of 15-5, the sales exceeding 109,000 shares.

Speculative belief that the government's new taxastion program will involve a levy on the undistributed surplus of industrial corporations to take care of the government dedcit is responsible in part for the recent activity in the shares of companies with rigantic surplus accounts. It is pointed out that by distributing the extra tax possibly may be avoided or if made retroactive that the individual stockholder and not the scopporation will pay the bill, in which case the aggregate tax, assuming it is a graduated one, would be cognificably may be avoided or if made retroactive that the individual stockholder and not the scopporation will pay the bill, in which case the aggregate tax, assuming it is a graduated one, would be cognificably mailer.

The last annual statement of the Standard Oil Company of New Jersey showed a surplus of \$552,021,-622, while the United States Steel Corporation's surplus of \$552,021,-622, while the United States Steel Corporation's surplus of Dec. \$21, 1231, was \$562,224,562. The Original, or The Imitation?

N buying silverware or silks or securities, common sense dictates the purchase of the original article rather than the imitation. There can be no argument on that score. The imitation is never "just as good."

Every investor knows that the policies and methods of S. W. Straus & Co., the Straus Plan, and Straus Bonds, are being widely imitated.

Our record and experience, however, cannot be in tated. This record is unique, covering as it does forty years in time; a score or more large cities all over the country in scope; and hundreds of millions of dollars in safe securities in volume.

First mortgage real estate bonds merit your consideration as safe investments. And the best bonds of this class are Strong Bonds-the original, not the imitation. At the present time these bonds yield 61/2%, in \$1,000, \$500 and \$100 denor tions. Call or write today for our current investment suggestions, and specify

The following information is summarized from letters of R. C. Warriner, President, and William Wallace Mein and from our own investigation:

Properties: The Continental Mines, Limited, is not a producing property and as yet has no definite tonnage blocked out. At Kirkland Lake, Ontario, the company holds 27 claims immediately adjoining, in the line of the direct extension of the Main Fracture Zone, the producing gold mines of the district. At Cobalt, Ontario, the company will operate through a subsidiary the properties of the Colonial Mining Company, comprising 68 acres.

Surface sampling and trenching on the Continental claims have given most encouraging results, with assays of \$15.20 to the ton.

Colonial Mine: In the Colonial Silver property at Cobalt, the Continental Mines have a valuable asset. There is excellent authority for the statement that the O'Brien Mine management is mining, at the Colonial boundary, a high-grade vein of considerable width, carrying a very rich streak characteristic of the best Cobalt ores. A three-compartment shaft is now being sunk on the Colonial property, which should be completed early in 1923.

Operating Facilities: Every factor with respect to transportation, labor, power, etc., is in favor of the company's operations at both properties.

Another thing, I didn't say that there was \$38,000,000 laying around Signal Hill waiting for somebody to come out and pick it up. Enough people have bawled me out for causing them to drive thirty miles and then not find a single \$20 gold piece. What I really said was that the oil wells at Signal Hill were turning out that much money per year. But understand me

per year. But understand me right—it's going into storage tanks —not out on the ground.

There's one thing I am sorry for —and I don't hardly know how to explain. I said Santa Fe Springs is a roaring, gushing, spouting oil field, but that it takes a "he-man" to get an oil well there! How was I to know, I ask you—that a woman owns an oil well down there! How was I to know that it sits right in her back yard and that she don't have to do a stroke of housework again as long as she lives.

And now I leave it up to you—did I say one word against Harry Failing, who is drilling Californian Well No. 1. The only thing I said was that I didn't see how a bird with a name like that could hope to make a success of anything.

make a success of anything.

Don't worry about how much space this ad takes up. We use so much space selling our units that we get an awfully good rate. The more we use the less it costs. But on the other hand we sell lots of units. I reckon we've sold more than any other three firms put together but then — we'ra lucky and besides we've somehow got in the habit of always getting oil. We've put over seven syndicates and never failed to get oil yet, and we're all agreed that it would be a dirty shame to spoil a record like that.

So we've decided to get oil for Call-fornian. In order that we may be sure of getting it, and disliking to disappoint anyone, especially our-selves, we've put five leases into Californian. And the fellow that can't get at least 200 barrels of oil

I probably won't have any ad in tomorrow. I think I'm fired. Mr. Foster says ruined his business. I'm sorry because it really was a very nice business. But satisfied more people called up the office yesterday than ever called up before. I called up and called me down. But that's all right. I sure showed up the financial editor of one paper as a dumb-bell that doesn't know a good ad when he sees it. He came over and said that if we ran another ad like that Sunday one, he'd cancel our contract. How he holds HIS job is another thing that has me guessing. But, as this is probably the last ad I'll write—either on account of my being fired or my ads have sold more units than we've get—I'll have to start right in selling Californian units NOW.

I hate to do is because it cramps my style but still, I don't see any use of selling any more units. Sunday's paper has a circulation of about 200,000 and I guess everybody that read my ad has sent us a check—only it just ain't got here yet. Half of them must have sent a check anyway and since there's just 4000 units all told to share in Californian and most of them were already sold even before my ad

about thinking Californian never would get any oil at Athens-on-the-Hill. It appears that I was missaken. Anyway, every geologist in town has got me on the phone, and the language they used showed me once and forever that all geological words aint big and soft-sounding. Some have an awful wallop!

To save any more of them the trouble trying to get a call through the telephone exchange in less than an hour and a half, and it appearing that i am in the minority, I hereby affirm that I think Californian will get oil at Athens-on-the-Hill. Now that's settled.

Then—someone else called up to advise me that Signal Hill was fifteen months old instead of twelve. I also apologize for this. But I still maintain that 97 oil wells 3200 feet deep turning out more than 100,000 barrels of oil per day make an almighty great oil field, regardless of whether the age of the child is twelve months or fifteen.

Did anyone get the idea that I said there were 97 diamond mines in Africa? Some bird called me up to give me the correct count on this. I have been misquoted. What I said was this: IF there was 97 dia-

resaid was this: If there was 97 dia-mond mines in some desert in Africa, and IF those mines was turning out \$400,000 every year, like the 97 oil wells on Signal Hill, and IF Californian had five diamond min-ing concessions a hundred miles away from that desert—

Why the Pacific Finance Building, being a real orderly place, would ask us to move our office and stop the riot of folks trying to buy units in that diamond syndicate. But be-

TREASURE HUNTERS WILL TRY AGAIN

PAIL THIS TIME TO DIG UP GOLD BURIED BY PIRATE MORGAN

PECLOSIVE DISPATOR, ELIZABETH (N. J.) Oct. npty-handed, but with faith unhaken, the members of the ex-edition which left here June 20,

could have penetrated to the cache of gold.

Edward W. Bowne of Newark, head of the party, made the contract with Frederick L. Blair, leasee of the territory known as Oak Island, and against him is aimed most of the criticism for the failure of the axpedition. One of the adventurers, James R. Cameron, eald that a new expedition would be equipped with modern appliances and, led by himself, would make another attempt next spring. He said Bowne, with inadequate tools, improper methods and lack of competent workmen, was able in nine weeks to push a thirty-inch steel pipe fifty-seven feet into the soil.

Borings Blair made six years ago disclosed that a circle twelve feet in diameter is free from rocks for as great a depth as he was able to push his excavation, although all the surrounding ground is filled with boulders to a great D. Guyette, arrested in Seattle for depth.

Excavations have shown what appear to be drains, constructed presumably by those who buried the gold, and one drilling brought in from 170 feet below the surface what chemists said was the work of man.

Morgan was a Welsh miner before he turned to piracy. Only men familiar with mining and early caisson engineering could have done the work evidently done on Oak Island, the treasure hunters of Guyette, but failed to identify him when they were brought togethes.

# Where Do I Get Off?

Folks, this question has been asked me several times, possibly it has struck at too, so I am going to lay the exact facts before you, and show you exactly at I am up against when I invite you to participate with me in drilling a cou-

To insure the successful completion of the wells I am offering you assignate of production in at \$100 each today, I am calling for \$350,000, and I am to give you a clear idea of the real cost of this kind of an operation.

Let's suppose that you own, say, five acres at Santa Fe Springs, and you want have a well drilled by some responsible contractor, the price you would be sted would be \$125,000, this would be for completing your well to the stage bere it was ready to start flowing into the tanks, but we must now buy tanks.
In the size wells they are drilling in at Santa Fe Springs, ten thousand barrels storage is none too much for each well. This tankage erected will cost you

dollar per barrel, or ten thousand dollars for each well. On each of my properties at Santa Fe Springs, I happen to be drilling in an lard, where my lease calls for the payment of \$100 for trees damaged, red or destroyed, and to make room for my rig, sump holes, casing racks, are tanks and cutting roads through the property, a fellow has to cut down a tree. It cost me \$15,000 cash to the Globe Petroleum Corporation on my

in property in the same field, for the trees alone. In each of my wells I pay my drilling crews higher wages than any other ter in California, and on top of this I split a \$2000 cash bonus between to be in the oil sand in 60 days, but you can take it from me, "I HAVE

This 60% is divided into 3500 equal parts at \$100 with the actual production legally assigned to you. I have appointed one of our leading to act as Trustee for you, they collect and disburse to you every 80 days.

A new test of Einstein's theory of relativity will be made in Scuther; California.

This information was given yesterday before the Ebell Club by Prof. B. R. Raumgardt, who gave for the first time in-California his lecture, "Einstein and the Theory of Relativity and a Limited Universe."

Less than two weeks ago in Australia during an eclipse of the sun, scientists undertook to prove the new theory by photographs of the eclipse. English and German astronomers journeyed to Australia for this purpose, but because of a misunderstanding in the manner and time of photography, failure was the result. On September 12 of next year a total eclipse of the sun will be visible in Southern California. Einstein himself has said that there will be no better opportunity for this study.

William Fetesoff, aged 23 years. ormer Russian minister of San rancisco, was killed by the lungs of his automobile from the Autopsy Surgeon A. F. Wagner stated yesterday after the autopsy had been performed at the under

Santa Monica Boulevard, Sawtelle.

Fetesoff, known in Los Angeles as Martin, where he lived at 1603 Santes street, was at first thought to have been murdered, as two holes, resembling bullet wounds, were found in the back of his head, Investigation failed to reveal any bullets. In the opinion of Dr. Wagner the wounds were caused by windshield braces or sharp rocks striking Fetesoff's head when the machine turned over on him at the bottom of the canyon. The accident is presumed to have been due to confusion on Fetesoff's part, as the car apparently plunged off the road on a sharp turn. Fetesoff rented the car at Parsors Brothers' Garage on September 31. It is believed that the body lay undetected from that date until Sunday.

After working nearly all night in an attempt to escape from the County Jall by bending back three bars and tearing out a wire screen, eleven prisoners in tank No. 9 of the institution still found themselves very much in jall yesterday morning and cut off from all former privileges. One privilege which is lost for a week and which is missed most is the use of tobacco.

The attempted break, which might have developed into a jail delivery, was discovered by Turnkeys Wilson and Heller, who reported at once to Acting Jailer Railey. The jailer immediately had the eleven transferred to other tanks and ordered that they all be denied for a week the right to get tobacco, milk and other things permitted under the jail rules.

The inmates had taken the ropes from the'r cots, doubled them up and pulled on three bars, until the metal worked loose from the cement holding them, and then bent back the bars. A wire screen was taken of and held in place with a piece of string, so as not to arouse suspicior

Lydia E. Pinkham's Vegetable Compound Has Helped Form Many Many

Reading, Pa.—"I was a nervous wreck and could hardly do my housework. I always had to have help or I would never have got it done. Through the advice of friends I have been taking Lydis E. Pinkham's Vegetable Compound for my nerves and Lydis E. Pinkham's Blood Medicine for my blood and I am feeling fine and doing my work all alone. I can recommend these medicines to any one, for they certainly helped me. I suffered for five years and Lydis E. Pinkham's medicines pulled me through."— Mrs. WALTER U. STOYER, 1218 Mulberry St., Reading, Pa.

For the alling half-sick housewife such a union is impossible. Often times even the slightest form of housewer cannot be accomplished. Yet the work must be done.

Many wernen struggle along for years suffering from some form of female trouble that makes their lives miserable and their homes far from hany.

female trouble that makes their lives miserable and their homes far from happy.

Lydia E. Pinkham's Vegetable Compound has helped thousands of just such women regain their health and strength. Just give your thought to the following letters and remember that the women who wrote these letters knew how they felt before taking the Vegetable Compound and again afterwards. It helped them—let it help you.

Had Nervous Spells
Horatio, Ark. — "I had nervous spells and awful had feelings. My right side and my back hurt me all the time and I had been going down in health for six or seven years. For three years I had not been able to do my work without help. I weighed only 95 pounds when my husband's mother persuaded me to take Lydis E. Pinkham's Vegetable Compound. Now I heartily recommend it to all suffering women, as I have gained weight and health. I can do all my work, anything I want to do."—Mrs. JIM KEARICK, Horatio, Arkanssa.

JUDGE McLAUGHLIN

OPPOSED TO THE

WRIGHT ACT

AGAINST THE WRIGHT ACT

(PROPOSITION NO. 2 ON THE NOVEMBER BALLOT)
By CHARLES E. McLAUGHLIN, of Sacramento

Wisdom dictates that California electors reject this new departure and unusual law, If this "Wright Act" becomes the law of California, we must either

recruit and compensate more peace officers or de-tach from an already inadequate staff more "purity squads" to seek illicit loves, liquors and stills whilst unprotected homes and business places are looted and burglars, robbers and murderers revel in an ex-

If this act imposed upon California the enforcement of ALL national penal laws entailing tremendous expense, it would be overwhelmingly defeated. Yet this would be more logical than the selection of ONE such law for enforcement at the expense of California Taxpayers. California should refuse to assume

either burden. Our government rests on the principle that functions of State and Nation are distinct. Disregard of this principle is hazardous. Teetotalers, even prohibitionists, opposed the eighteenth amend-

ment as radical departure from our system of govern-ment which vested in each State EXCLUSIVE POW-

ER to regulate the conduct of its citizens. Admon-

ished by study and experience that infringement of this power must cause friction and strife, they held integrity of government higher than prohibition or any pretext for such a dangerous precedent.

any pretext for such a dangerous precedent.

Zealotry now proposes a further revolutionary change in the surrender by California of the power to make and change its laws in the "adoption" by reference of the national "Volstead Act" and, worse still, all future amendments of and substitutes for that law. "Adoption" is a new, strange, careless method of making laws and when applied to future Congressional productions is as foolish as the adoption of unborn children who may suit and may not. Our State constitution forbids the "adoption" of laws by references to title, and it is elementary that future Congressional acts cannot amend, repeal or supersede the Volstead Act should it become State law. Prudence should not sanction nor courts approve this novel method of enacting and perpetuating law. If, however, this "adoption" proceeding should carry, fanatical persistency may boast a "glorious victory" and a reversal by California electors of their rejection in 1914, 1916, 1918 and 1920 of "prohibition" laws as promotive of "temperance." The consequences may then be left to chance and courts. Opposition is characterized as hostility to law enforcement. But abuse is never argument and multiplication of laws, officers, expense, accompanied by divided responsibility does not aid law enforcement. Pretense that the nation alone cannot enforce the "Volstead Act" is hypocritical reflection on national integrity and power. Resort to revolutionary change and State intervention has been unnecessary to the enforcement of more important national penal laws than this and mere reform of personal habits and appetites does not justify it.

This tendency to intermingle, confuse and change func-

tra "wave" of crime. We should do neither. fornia should not unnecessarily assume national bur-dens. She has quite enough of her own. Our people are not responsible for the situation.

A woman has the right to ask ber husband where he has been if he stays out all night and does not explain where he was. But in the case of Mrs. Evelyn I. Olson, when ashe asked her husband, Edward A. Olson, the question, she told Judge McLucay yesterday that he pushed her agginst a wall and bumped her head on a nail. Mr. Olson said he did not push her against a wall. Purti. vrmore, he never stayed out all night during their married life. Mrs. Olson had other complaints against her husband. Because of the conflicting evidence, Judge McLucay is steeded for manufacture of tractors and oastings for motor vehicles.

SUFFERED ENOUGH

"I think I have suffered enough," he replied when the court demanded that he answer. "I have a paid the full penalty and I do not want to implicate some one else." The court ordered the witness-prisoner to stand before him and the latter did, leaning heavily on a large cane. McFee admitted, upon being questioned by the court and Deputies Turney and McCartney, that he knew that the usual punishment for contempt of court was imprisonment in the County Jail, and that he was there already and could not be punished by a fail sentence for contempt. "Yes," came the reply in a quivering voice, "I am in jail and expect I'll have to stay there a long time. I have been punished enough."

The court then adjudged McFee guilty of contempt of court and expect I'll have to stay there a long time. I have been punished enough."

The court then adjudged McFee guilty of contempt of court and

Tommy Davis is suffering acutely from insomnia, says a dispatch from the wilds of North Broadway. Every night he is troubled by terrible nightmares in which he sees immense football players in the garb of Long Beach men. After the men run for almost immensurable distances, he is in the habit of seeing them step directly upon some unobstrusive little boy in a football uniform whose colors are Orange and Black. He then wakes up and tries to place the face of the poor unfortunate man who was stepped on. It is usually well past "3 o'clock in the morning" when he is again able to woo the frightened sleep back to his sorely tried nerves.

The Poly men put up a game fight and despite the early start which the home team gained, the Mechanics evened it up in the section quarter by tying the score. A boner was pulled in the first five minutes of play by a Poly man and a Huntington Park flyweight took the pigskin down the field for a distance of 30 yards. This placed the ball within easy scoring distance and a couple of bucks by Fullback Kelly put the oval where it belonged. BY WIJAJAM T. TILDEN II, tempis Champion of the World 1920-21, American Champion PHILADELPHIA, Oct 1.

PHILADELPHIIA, Oct 9.—The tennis season is over, and I, for one, heave a long sigh of relief. It has been not only the greatest year in the history of the game, but also the hardest for the mas who have hattled their way to positions in the select circle of the first ten.

Let me state that I do not believe that the ranking committee will rank the foreign stars who played on our courts this year except Shinidsu of Japan, who is now a resident of New York. Nor do I believe they will concur with my ranking, a matter which may Gause me to doubt their judgment, while the tennis public will doubt mine. However, I have the advantage of the first word, even if they must have the last.

A well known resident of Cincinnati, Ohio, who has been a barber for more than forty years, recently made the following statement:

"Anyone can prepare a simple mixture at home, at very little cost, that will darken gray hair, and make it soft and glossy. To a half-pint of water add I counce bay rum, a small box of Barbo Compound and ¼ ounce of glycerine. These ingredients can be bought at any drug store at very little cost. Apply to the hair twice a week until the desired ahade is obtained. This will make a gray-haired person look twenty a gray-haired person look twenty years younger. dollar if you go to the Or-im this week. You've got a thing. There are at least four of sheer delight, with nothing the real headaches on the bill we draw sometimes down

of the slience and to great artistic purpose. Pictures are certainly serving a twofold purpose. They are training actors, but what is far more, they are also training audiences. Waithail was doubtless always an artist of quality, but I venture to may that he himself will admit that he has gathered not only prestige from his picture acting, but a concentration of dramatic power and finesse.

As to the training of audiences, pictures are quite painleslly handing out information and culture and appreciation of the beautiful to the fans. For one thing, the films bring artists like Waithail to the ken of theater-goers. Then pictures bring, quite as a by-product and incidentally certain stores of information, cultural suggestion and beauty to the attention of the fans. Pictures have a negative value, too. Tiring of their bansities; people are turning to better things. Hence our little theaters; hence such excellent stuff as "The Unknown," which does not depend alone on its war phase for

PINK GODS" DEPICTS IT GRAUMAN'S

ly interested in her fate, it is hard to give her your unequivocal sympathy.

Unless you do give her sympathy, however, there is little else to hang your feelings on. The character of the titled British indy is negative. The only thing she really does is to race to the rescue—and that too late for any good to the real heroine. All that remains their is for her to appear in the pseudo-happy-ending fade-out with the diamond king.

Drama'ically "Pink Gods" is somewhat at sea. It veers constantly toward the artificial, and though all in all it sails a comparatively straight course, there are many aggrayating currents and winds that threaten the voyage.

Withal, it is an interesting picture. Pearlyn Stanlaws, the director, has aught an atmosphere that holds you in spite of the machinated plot. It may not be traditional South Africa—I can't vouch for that. But there is a movie—sque effectiveness about the details of settings and conventions, as well as the climax of disaster, that are free from the commonplace.

The title of "Pink Gods," too.

disaster, that are free from the commonplace.

The title of "Pink Goda," too. is for some reason rather intriguing. It suggests so many things to the mind. It has nothing, however, to do with Buddhaa, or billikins, or incense smoke, nor yet pink tights sor pink pajamas. The "pink gods" are really the sparklers themselves. "Pink god" and "biue devils" are the names they take.

THE DIAMOND LURE

Don't harbor a passion for dia-monds. It may result—well, in something too frightful for words, like flagellation, murder, arson or

Goda," which made its "environie" debut yesterday at Grauman's Theater. The picture is one of those that is fantastically different—that is its supreme recommendation and the reason. I must confess, why personally I really was much interested.

The locale is South America—Kimberley in the midst of the diamond fields. The plot is the thankless one of the woman who gets a lesson in how to be good. The motif is the unholy fascination which the sparkling faceted geme hold for certain minds.

It is difficult for one not acquainted with diamond fiends to understand the potency of this fascination. It is, however, a fact. Some people are much addicted to diamonds as others are to drugs. They are frantic for their possession, but just as the work-

drugs. They are frantic for their possession, but just as the workings of the drug fiend's complexes are hard to comprehend, so are those of the diamond addict. We here enter on the province of the pathological.

In so far as it is pathological, therefore, "Pink Gods" inclines to unpleasantness of a not vigorous type. I do not recken it, therefore, as among the popular photoplays. The main feminine character is the victim of the diamond insanity, and while you are naturally interested in her fate, it is hard to give her your unequivocal sympathy.

Officer Everett Hack, who was shot twice and seriously wounded three weeks ago by yeggs whom he surprised in the act of blowing the Woolworth Company's safe at their store at Hollywood Boulevard and Cahuenga avenue, has been released from the hospital and is now reported well on the road to recovery. It is said that the stomach wound, which at first was thought might prove fatal, turned out to be not very serious, as it was found that the bullet first struck a heavy belt buckle and was diverted. The second shot fired by the thieves struck the officer's right hand and tore several of the ligamenta. It is this wound that required so much care. Fred Snell, aged 55 years, said to be a licensed real estate broker, was yesterday found guilty by a jury in Police Judge Frederickson's court of a violation of the morals law. He will appear for sentence at 10 a.m. tomorrow.

Snell, according to the testimony of three women, made a practice of decoying girls to his home at 2226 Loma Vista Drive through an advertisement for "unincumbered girls to act as real estate saleslades," and then attempting to mistreat them. Police Officers Hoy and Johnson, who arrested him, declared that they had received scores of complaints from women regarding Snell's activities and asserted misconduct with them. After the verdict of guilty was returned by the jury Snell was released on \$500 bail. pense the passage of the act would bring to the taxpayers of the State.
